

BaseMapDataObject

```
graph BT; MapDataObject --> BaseMapDataObject; MultiPolygonObject --> BaseMapDataObject;
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'BaseMapDataObject'. Below it, a horizontal line connects two boxes: 'MapDataObject' on the left and 'MultiPolygonObject' on the right. A vertical line descends from the center of this horizontal line, ending in an upward-pointing arrow that points to the bottom center of the 'BaseMapDataObject' box. This indicates that both 'MapDataObject' and 'MultiPolygonObject' inherit from 'BaseMapDataObject'.
